

Los Locos de la Azotea - v.4.0

The four Locos de la Azotea: Los Locos de la Azotea. They brought the effort for the first radio broadcast in Argentina, and subsequently established one of the earliest regular radio stations in the world. More information in [Wikipedia](#).

iOS app for radio streaming, resources online and podcasts. Here you can listen to any online radio and available podcasts around the globe in different languages: German, English, Spanish, French, etc.

There is a list of proposed radios, or you can configure your own in Bookmark.

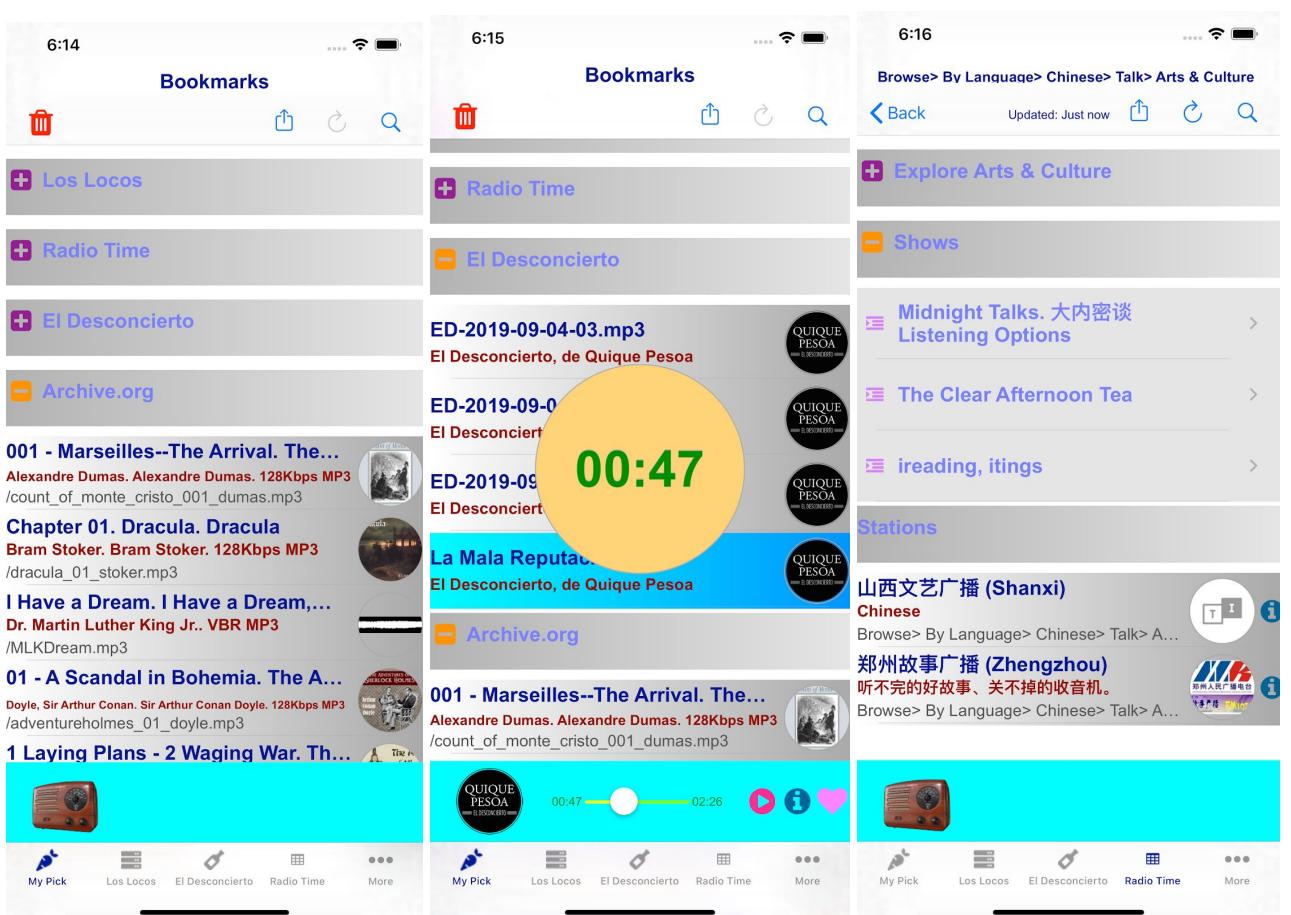

Do you know "El Desconcierto" from Quique Peso, here you can listen to the stream online or the previous emissions.

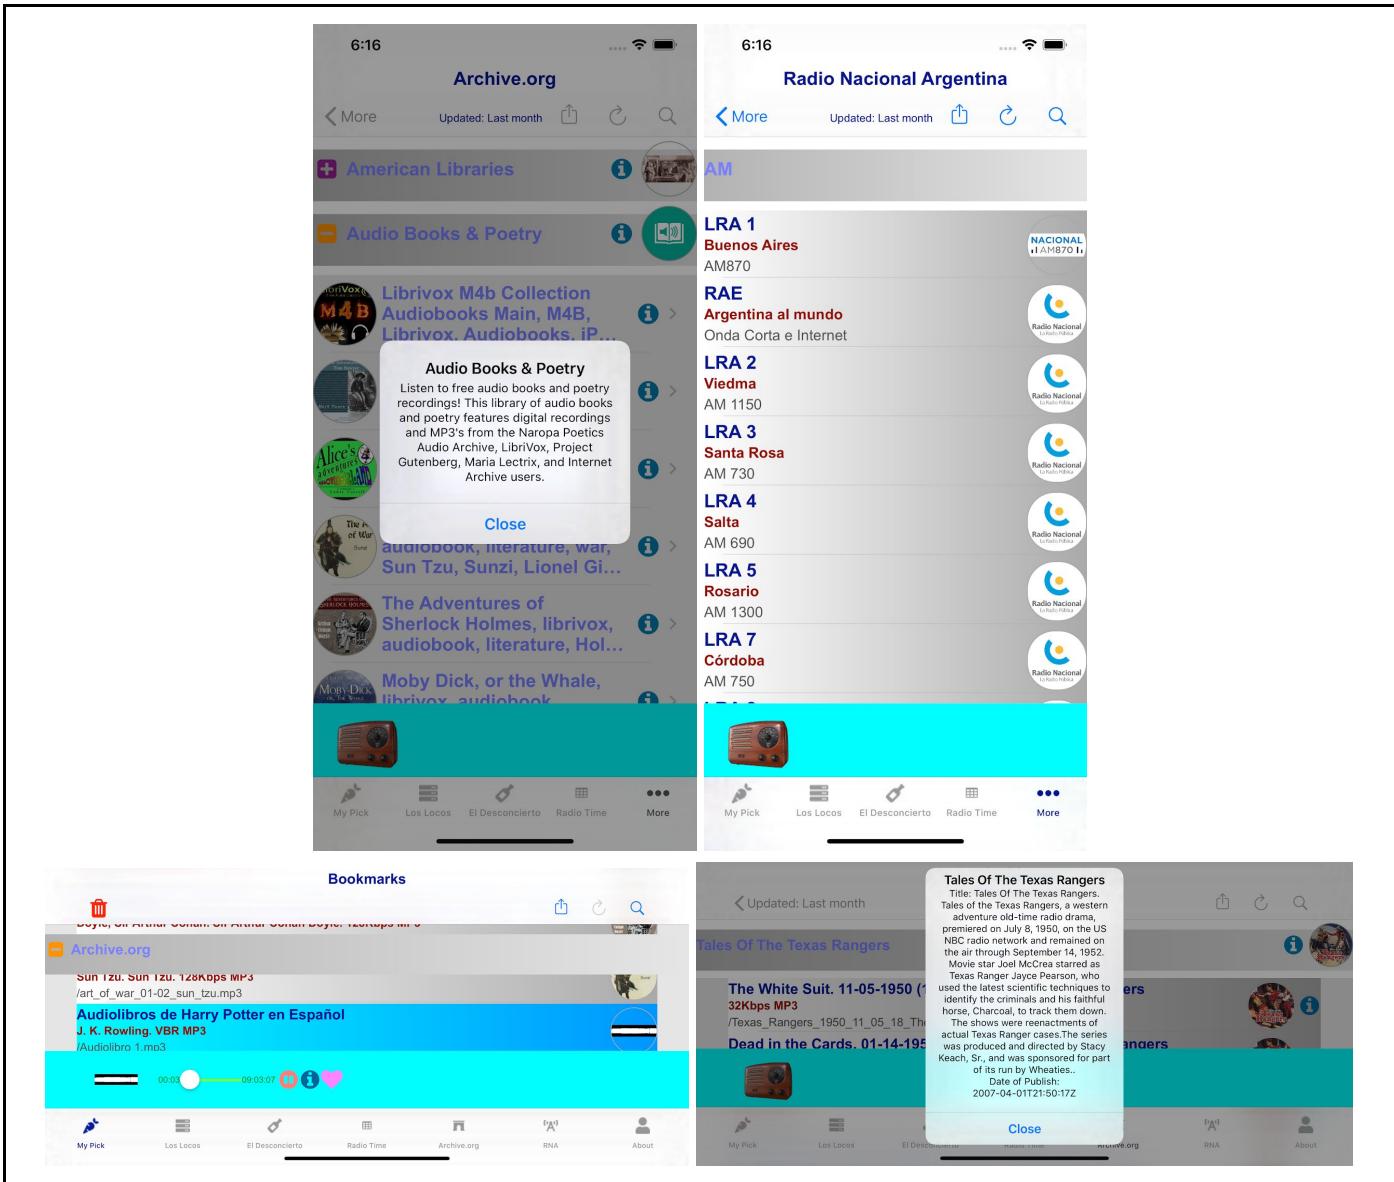

There is also a list of RNA (Radio Nacional Argentina) stations.

It included Archive.org audios and Radio Time audios.

Source code: <https://github.com/southfox/radioaws/tree/master/ios>. Published Jul 28 2019

iOS Client

Available version 1.0 in Apple Store

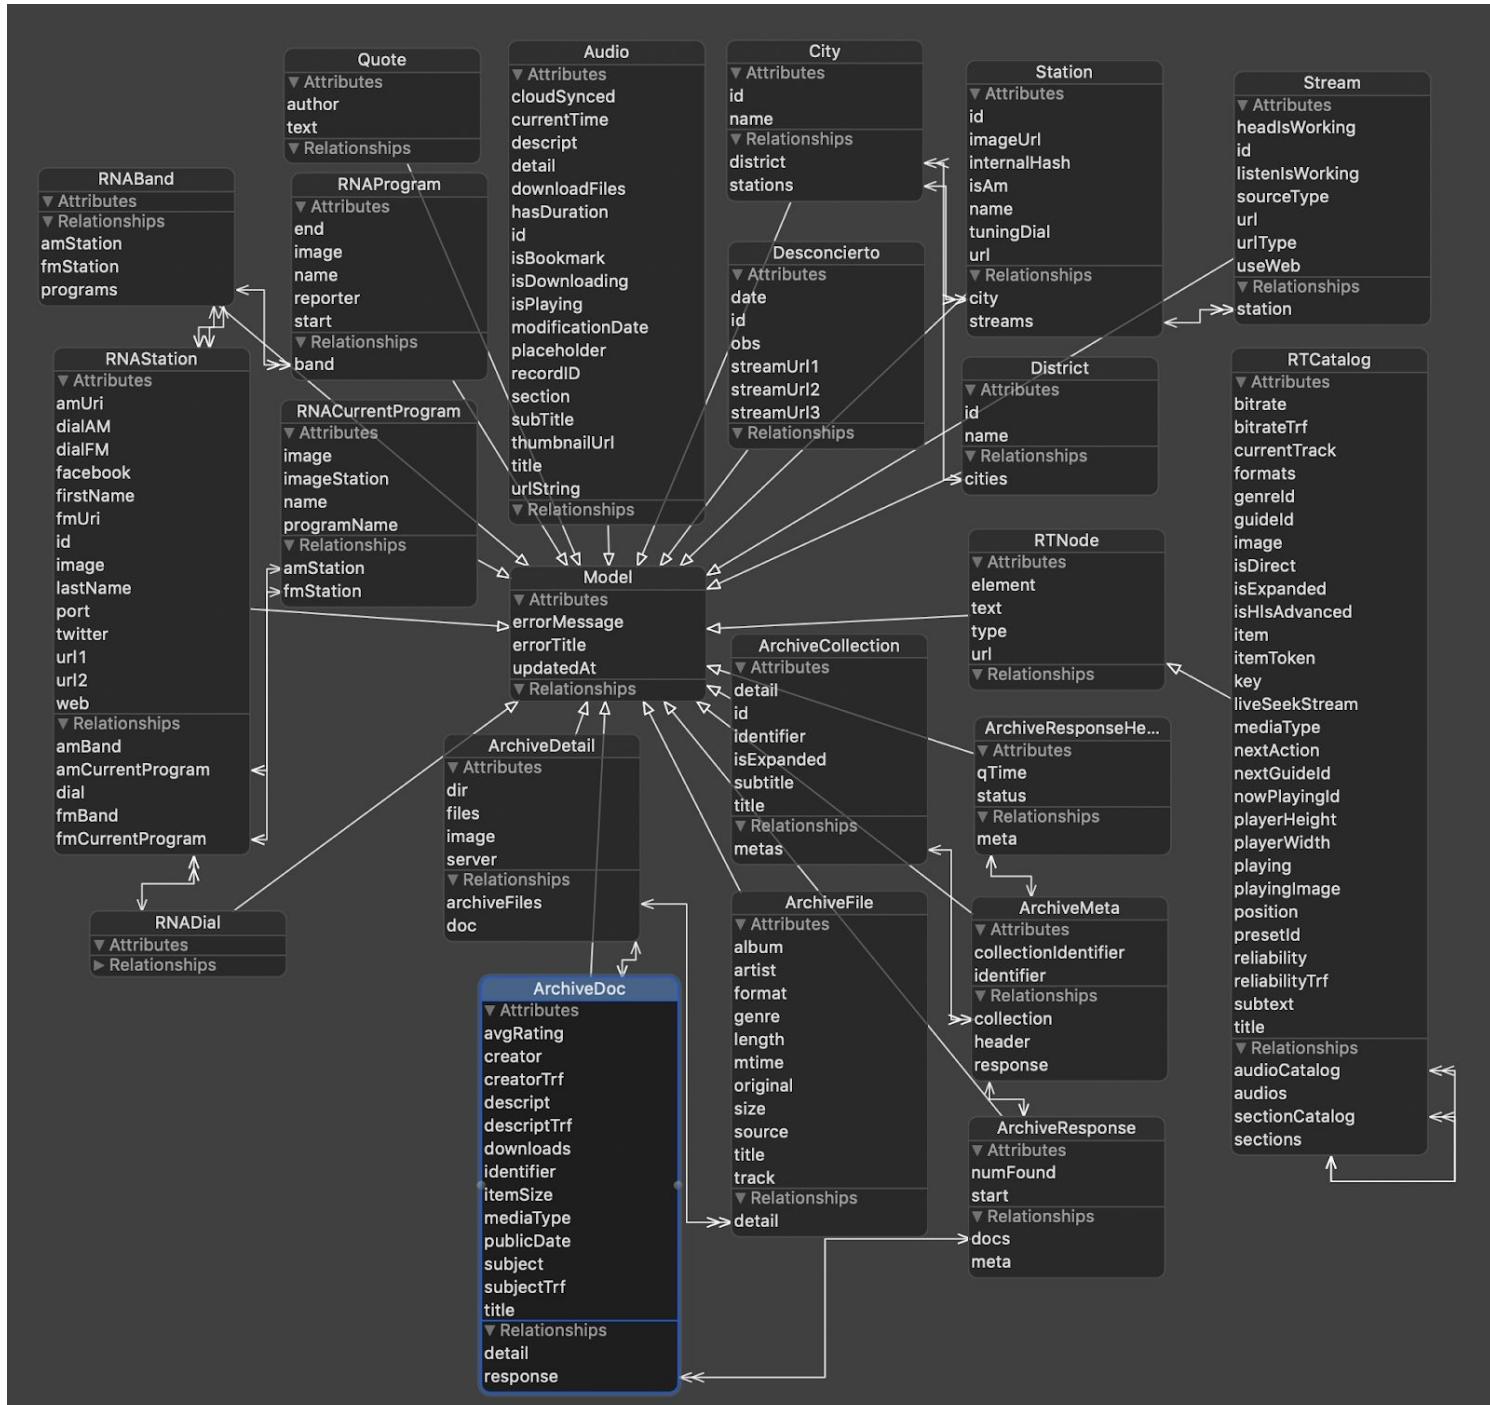

<https://apps.apple.com/us/app/los-locos-de-la-azotea/id1474338334?ls=1>

Requirements

iOS

- Xcode Build Version 10.2.1 (10E1001)
- Deployment target: iOS 12.0
- Devices: Universal (iPhone / iPad)
- Rotation: all.

● Data Model: Core Data Relationship

External resources

- Using a `ios-icon-launch-generator.sh` thanks to [smallmuou/ios-icon-generator](https://github.com/smallmuou/ios-icon-generator), it's a script to generate iOS/macOS/watchOS app icons more easier. I've added **Launch Images**, and a more customizable way to generate Landscape launch images for iPhone/iPad.

- [FontAwesome](#). *Font Awesome Free* is free, open source, and GPL friendly. You can use it for commercial projects, open source projects, or really almost whatever you want.
- [Quotes](#). Thanks to [JameFT/Database-Quotes-JSON](#)

My Own Library

[JFCore](#) *Some interesting Core elements to reuse in my own projects in iOS / macOS / tvOS / watchOS: CoreDataManager, Location Manager and others.*

External Libraries / Frameworks

[Alamofire](#) *Alamofire is an HTTP networking library written in Swift.*

[Groot](#) *Groot provides a simple way of serializing Core Data object graphs from or into JSON.*

[AlamofireCoreData](#) *A nice Alamofire serializer that convert JSON into NSManagedObject instances. Using a fork for now until tvOS is fully supported <https://github.com/southfox/AlamofireCoreData>*

[AlamofireImage](#) *AlamofireImage is an image component library for Alamofire*

[SwiftSpinner](#) *SwiftSpinner is an extra beautiful activity indicator with plain and bold style fitting iOS 8 design very well. It uses dynamic blur and translucency to overlay the current screen contents and display an activity indicator with text (or the so called “spinner”).*

Install

1. Clone repository `git clone https://github.com/southfox/radioaws.git`
2. Enter inside the folder of the project `cd ios`
3. Install pods `pod install`
4. Open workspace `open LDLARadio.xcworkspace`

5. Clean and build project with Xcode.

Endpoints

- The Rails server with Suggestions.
- Radio Time: it's the RestAPI used by [TuneIn](#)
- Radio Nacional Argentina
- Archive.org rest api

Proposal:

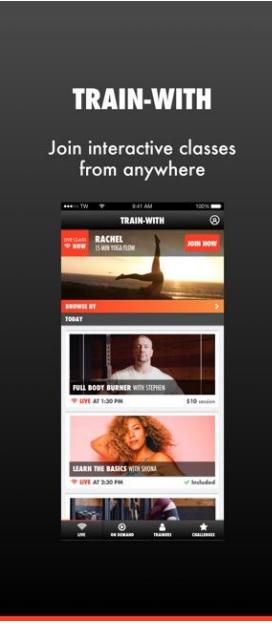

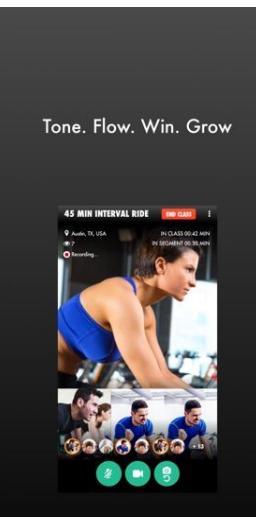

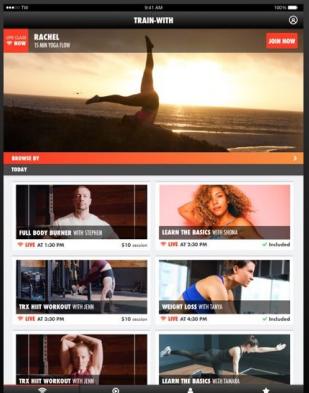

- Cocoapod integration in the project
 - Using Swift 5
 - Storyboards
 - Asset Catalog
 - MVC & MVVM: Separated Logics and avoid Massive View Controller
 - Completion/Closure Parameters
 - Recycling
 - Minimalism
 - Core Data
 - Code Testing
 - Singleton for RestAPI and model & network management.
 - Observers: KVO and Notifications
 - Protocols
 - Extensions
 - Grand Central Dispatch or GCD
 - Cloud Kit integration for favorites
-

Tile - Find lost keys & phone

Find everything that matters to you, with Tile. Our Bluetooth-enabled devices and handy app make everything findable. Tile helps you locate everyday essentials during your daily routine, removing little inconveniences, and helping you stay organized so you can do your best and focus on what matters.

*Ring your things
Use the Tile app to ring your Tile if it's nearby. Just tap the 'Find' button.

*Find your phone
Double press the Tile button on your Tile to make your phone ring, even when it's on silent.

*See it on a map
When your Tile is not nearby, you'll see the last time and place it was updated on a map so you can retrace your steps.

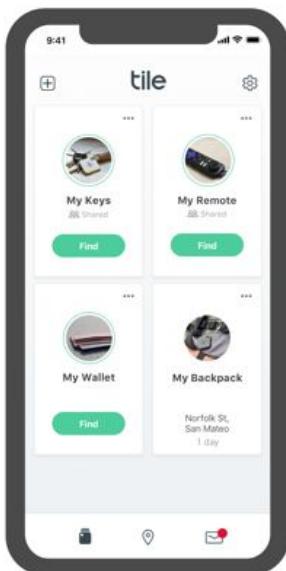

*Use community find
If your Tile is truly lost, select "Notify When Found." When any user in Tile's global network comes within range of your missing item, the Tile app will notify you about its most recent location.

*Ask Your Smart Home
The easiest way to find is by using your voice. Set up Google Assistant, Amazon Alexa, and Siri to find with Tile.

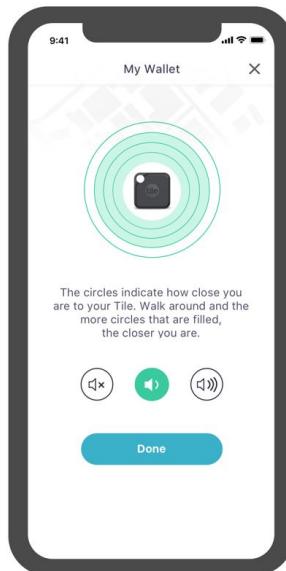

<https://apps.apple.com/us/app/tile-find-lost-keys-phone/id664939913>

Working with Core Bluetooth Low Energy devices using Apple Core Bluetooth framework, Core Data, Core Location and MapKit. Also using RxSwift and MVVM.

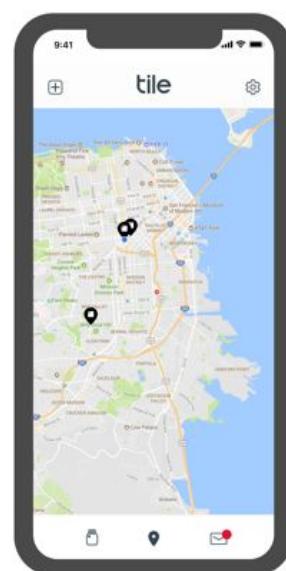

Attach Tile to the things you care about

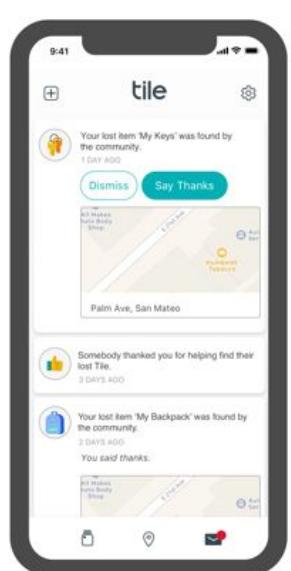

Ring your Tile once it's in range

Find your Tile's last known location

Find your lost items with help from the Tile community

My Disney Experience - Walt Disney World - Disney

The official Walt Disney World® app! Now it's easier than ever to plan and share your vacation details—at home and on the go.

- Quickly access real-time wait times, park hours, Character greetings, parade showtimes and more.
- Use the interactive, GPS-enabled map to explore Walt Disney World Resort and easily see the dining options, attractions and more nearest to you.
- Find your way around with step-by-step directions to locations across Walt Disney World Resort.
- Purchase your theme park tickets.
- Buy merchandise from Shop Disney Parks on the app. Browse keepsakes, find items in the park and ship to most U.S. addresses.
- Browse restaurant menus, make dining reservations, modify existing ones and even order your meal right from your phone at select locations.

<https://itunes.apple.com/us/app/my-disney-experience-walt/id547436543?mt=8>

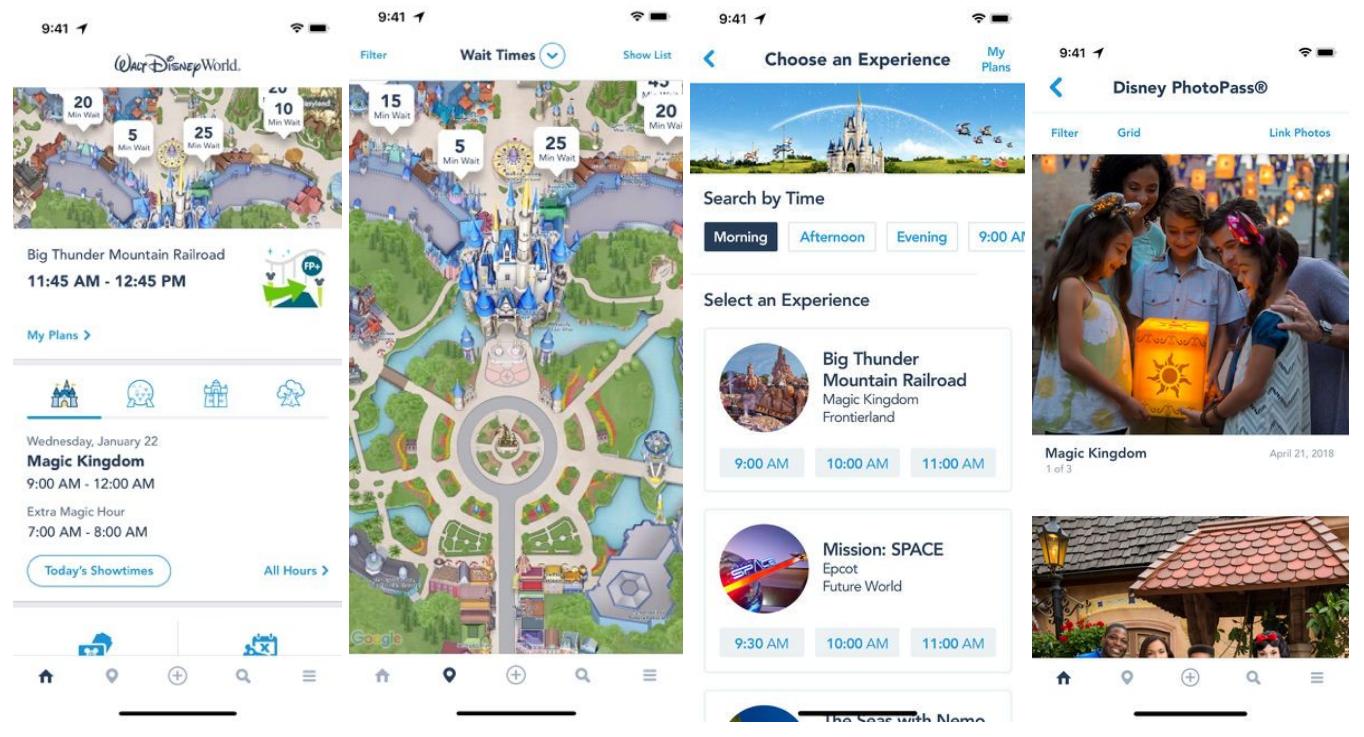

Managed back-end rest-API changes, issues and new functionality

Held meetings with back-end developers and QC

Collaborated in architecture definitions

Fixed issues around different frameworks related to the core, plugins, profile, payment methods, and remote configuration

Objective-C using RestKit, iOS 12, custom CocoaPods Unit tests/mockup application using Swift 4 using Alamofire, Core Data, XMPP, Sift, MixPanel and Crashlytics, Mantle, SDWebImage and Analytics.

Bug fixing. Swift, CoreLocation, Core Data, and Alamofire.

Health Partner Knees & Hips - Johnson & Johnson Health and Wellness Solutions, Inc.

Supporting you before and after knee or hip replacement surgery

Congratulations on deciding you're ready for joint replacement surgery! Being prepared can help you have a better experience, and the Health Partner app is here to help. This app is personalized for you based on your surgery date. Every week, you'll receive the most relevant information for each phase of your joint replacement journey — from four weeks before your surgery to 13 weeks after.

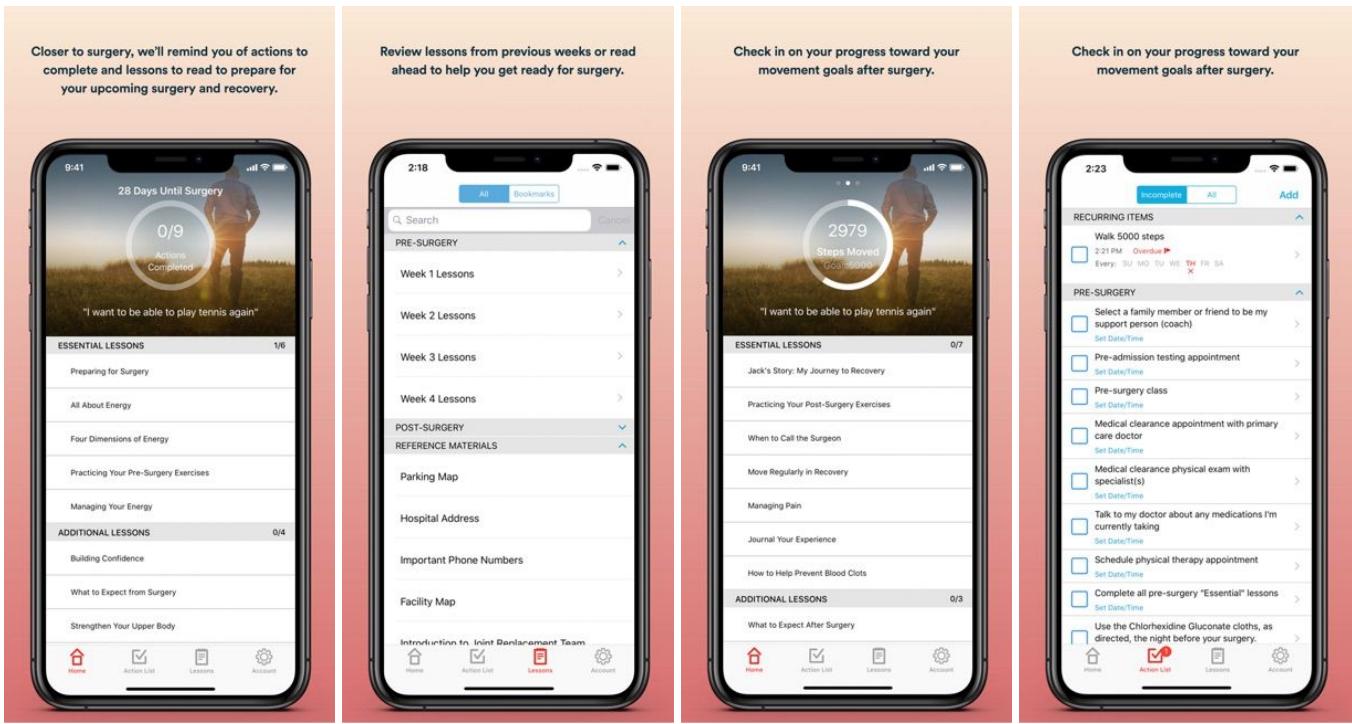

The app offers:

- Guidance about what to expect before and after surgery.
- Suggestions about how to cope with pain.
- Motivational, real-life stories to help you emotionally prepare for surgery.
- Practical information and tools for building a support system.
- Tips to help you exercise safely and eat so you feel energized.
- 24/7 coaching to help you stay connected to your goals and celebrate your progress through recovery.
- Integration with Apple's Health app to track your daily steps and walking time.
- Ability to set up your own Action List with important tasks or activities before and after surgery.

The Health Partner for Knees and Hips app also connects you to proven behavioral science and energy management techniques developed at the Johnson & Johnson Human Performance Institute. The app's videos and interactive lessons offer information and encouragement to help you feel prepared, stay focused, and set you on your path for success.

Sports Chat Place - expert winning sports picks

Get Winning Sports Picks- Start Winning today with Sports Chat Place. **** FEATURES **** + Daily videos with tips and advice + Picks available for multiple professional and college sports leagues (free and premium) + Get sports picks from a variety of experts + Sign up for our newsletter to get important updates

<https://itunes.apple.com/ar/app/sports-chat-place-expert-winning/id699644048?l=en&mt=8>

The image shows three screenshots of the Sports Chat Place app. The left screenshot is the home screen with sections for 'Sports Chat PLACE', 'MITCH'S DAILY APP ATTACK VIDEO', 'Sports', 'SHAKE YOUR MONEY MAKER', 'NBA', and 'NFL'. The middle screenshot shows a video player for 'Mitch Wilson' with a thumbnail of him and the text 'New England Patriots vs. New York Jets'. It also shows a '01' icon and the text 'Date & Time: NFL: 12 Sep 2013 at 21:00 (Gillette Stadium)'. The right screenshot shows a list of 'College Football' games with thumbnails of experts: 'Doc's Sports' (\$39.99), 'Mitch Wilson' (\$29.99), and 'Mitch Wilson' (\$19.99). Each expert has a lock icon next to their name.

Tripbook – Photo Travel Scrapbook on the App Store

Tripbook is a simple way to showcase your photos in a digital scrapbook. Keep your travel experiences grouped together, while easily sharing them with friends and family. Photo sharing should be fun and exciting, so edit your photos with stickers, frames, filters, collages, and more! You can also tripbook older trips by uploading photos to your iPad via SD cards, camera USB, iPhone pics into photo stream.

- +Enter your trip dates and Tripbook will automatically select photos within that date range.
- +Select photos to add and then filter, add stickers, frames and more!
- +Create photo collages
- +Select a background theme
- +Share Tripbook via Facebook and/or e-mail

<https://itunes.apple.com/us/app/tripbookphototravelscrapbook/id803081214?ls=1&mt=8>

Using Objective-C for iOS 6.0, Aviary SDK, Reachability, Facebook-iOS-SDK, RestKit.

The image shows a composite of three screenshots of the TripBook app. The top screenshot is a promotional landing page for the app, featuring the TripBook logo, an 'Available on the App Store' button, and a large image of a tropical beach. The middle screenshot shows the app's main interface with a header 'My Trips:' and a collage of travel photos. The bottom screenshot shows a detailed view of a trip, with a sidebar listing 'Cancun Oct. 6-14', 'Belize May 17-27', and 'Puerto Rico April 7-15', and a large image of a wooden pier over clear blue water.

MUSIC 2310 Blues Song 4+ - Dan Keast - The University of Texas of the Permian Basin

Compose a blues song using standard 12-bar blues chords by selecting your vocal range, adding lyrics in AAB format, practicing, then recording your performance. Record the video of your assignment, login to Canvas and upload.

<https://apps.apple.com/ar/app/music-2310-blues-song/id736814925?l=en>

Swift, Facebook-iOS-SDK, AFNetworking, JSONModel, and JTObjectMapping

The app interface includes the following components:

- Carrier:** Shows signal strength and battery level.
- Time:** Displays the current time (e.g., 12:17 AM, 12:18 AM, 11:57 PM).
- UTPB:** The application name.
- About:** A link to the application's information page.
- Keys:** A sidebar showing vocal ranges: G (sopranos), E (altos), F (tenors), and B (basses).
- Chord Selection:** A grid of 12 bars for selecting chords. The first row contains I, ii, iii, IV, V, and vi. The second row contains I, ii, iii, IV, V, vi, and vii. The third row contains V, V, I, and I.
- Verse Selection:** Labels for Verse 1 and Verse 3.
- Chord Structure:** A 4x4 grid showing the chord progression for each verse.
- Feedback:** A message "Your chord structure is CORRECT!" and a button "Continue and practice singing".
- Practice Features:** Buttons for Practice, Record, Play Video, and Complete.
- Lyrics:** A text field "I want to get an A" with a pencil and plus icon.
- Bar Numbering:** Numbers 1 through 12 indicating the 12-bar blues structure.

KalcuLytes - Electrolyte Replacement Calculator on the App - Blue Whale Apps, Inc. - KABBA, LLC

KalcuLytes is an application that is based on copyright formulae developed to calculate the dose and recommend the mode of administration of Magnesium, Phosphorus and Potassium replacement in adult patients with Hypomagnesemia, Hypophosphatemia and Hypokalemia. This app is designed to provide you with electrolyte replacement dosing by intravenous and oral/enteral routes. The dose is individualized based on patient's age, gender, weight, electrolyte levels and renal function.

**** FEATURES ****

- Calculate the dose and mode of administration for Magnesium, Phosphorus, and Potassium.
- In-App purchases for Magnesium, Phosphorus, and Potassium calculations.
- Provides electrolyte dosing by intravenous and oral/enteral routes.
- See target ranges for electrolyte inputs

SelectivePush - Domenic DiNatale - Intellitech Innovations.com

Not published.

The general idea of this application is to set up a selective push notification for gmail based accounts (include google apps domains). At some point the application may be expanded to use other domains' accounts outside of google. This design lays the framework for that expansion. The app is to be broken up into two separate pieces of functionality: setup and notification handling. Upon installation, user should link an account.

Monster Galaxy: The Zodiac Islands - Gaia Interactive Inc.

Battle & tame hundreds of wild monsters in this epic roleplaying adventure, already beloved by over 2 million players!

- * More than 125 unique monsters to catch!
- * An epic plot spanning 14 island levels!
- * Incredible hand-painted graphics!
- * An intricate plot inspired by legendary author/poet James Joyce!
- * OK, we were lying about James Joyce.

To defeat the loathsome King Otho, you'll have to catch and train your own team of monsters, explore fourteen huge levels and complete quests for some truly strange characters.

Only the finest monster trainers will survive-- do you have what it takes to tame them all?

Can't get enough Monster Galaxy? Learn more by visiting our website - <http://www.gaiaonline.com/monsterg>. We also invite you to check out our Facebook game at <http://www.playmonstergalaxy.com>. We would also appreciate it if you would share your thoughts about our game in the ratings and comment section below.

Cat fight animations. Implement gesture recognizer. Available date: May 2012

Current TV's Bar Karma - Current TV LLC - Nextive

Bar Karma is the first online community-developed network television series. Online users pitch their own ideas for scenes and twists online, using a tool designed by Will Wright called the Storymaker. Some are eventually chosen by the production staff, and are utilized to help create a new episode every week. The main plot revolves around a bar known as "Bar Karma", a bar that resides someplace in between parallel timelines. Up until now, the typical structure of the shows consists of a patron accidentally walking into or being transported to the bar, where they are shown the consequences of their current life actions, and the potential outcomes for their behavior and choices. This, ultimately, leads to a karmic dilemma, and forces the patron to make a life-altering choice.

Current TV: Bar Karma under iPhone/iPad (<http://current.com/shows/bar-karma/>)

Lang: Objective C (XCode), iOS 4.

OS: Mac OS Leopard / iOS4

Frameworks: SQLite/CoreGraphics/Quartz2D/WebKit

Libs: Facebook/Cocos2d/OpenGL/iAD.

Product site: <http://current.com/shows/bar-karma/>

iPhone: http://current.com/blog/92877343_bar-karma-now-on-your-iphone.htm

iPad: http://current.com/studios/blog/92931925_bar-karma-on-the-ipad.htm

iTunes: <http://itunes.apple.com/us/app/current-tvs-bar-karma/id407592200?mt=8>
Universal application.

Communication with server using google authentication (OAuth 1.0a protocol) & json framework to parse messages.

Development of a frame display of sequences of scenes (baselines). Allow add new scene pictures and descriptions, publish a new storyline.

Use of preexisting API in server connections. Data lives in server, and is updated in device. Use of EGO image cache & image downloader. Development of UI scrollers. Use of GoogleAds api.

Available date: March 2011

Updates: April 2011

Sorority Life - Playdom

	<p>Sorority Life was an online role-playing game published by Playdom on the social media platforms Facebook and Myspace in 2008. Each player assumed the role of a college sorority sister striving to increase her social status by improving her employment and wardrobe, the giving of gifts, and other activities. By the summer of 2009, Meretzky wrote that Sorority Life had three million monthly active users. By May of 2010, Sorority Life had over 5 million monthly active users, and 600,000-700,000 daily users, on Facebook.</p>

Communication with server.

Downloader of images & image cache.

User authentication using Facebook API.

Development of screens that allow user interaction with some of the features of the same game in Facebook site (see <http://apps.facebook.com/sororitylife/>).

Using TapJoy API to promote apps, StoreKit framework to sell new items.

Some of the functions:

- play events and socialize.
- fight other girls
- buy/sell glam items: shoes, clothes, rides, hair, glasses, boyfriends and accessories.
- change your avatar style
- take a job
- withdraw or deposit money in the bank
- admin account
- inviter other Facebook users, add/remove/deny invitations.
- Buy brownie points using StoreKit.
- Tutorial screens.

Update in 2011: choose/steal a boyfriend. Add limited edition glams.

Available date: June 2010 / Updated during 2010 until January 2011.

Social City - Playdom

Social City – A casual strategy game in which the player develops a city. Social City won the 2010 Game Developers Choice Online Award for Best Social Network Game. Inside Social Games rated Social City as the #2 Best Facebook Game of the first half of 2010. Social City also received an honorable mention on Gamasutra's list of the Top 5 Facebook Social Games in 2010. [Gamezebo rated Social City at 3.5 out of 5, highlighting balanced gameplay and "adorable" graphics. However, it was criticized for its lack of complexity: "Once you've mastered the game's ecosystem of manufacturing/residential/leisure, all you'll be doing is visiting your town to keep this balance in check and grow your city. Growing your city remains exciting throughout, but by the time you hit level 15 or so you just start wishing there was something more.

iPhone / iPod Touch application.

Communication with server.

Whoopee Cushion Deluxe - TheBroth, Inc

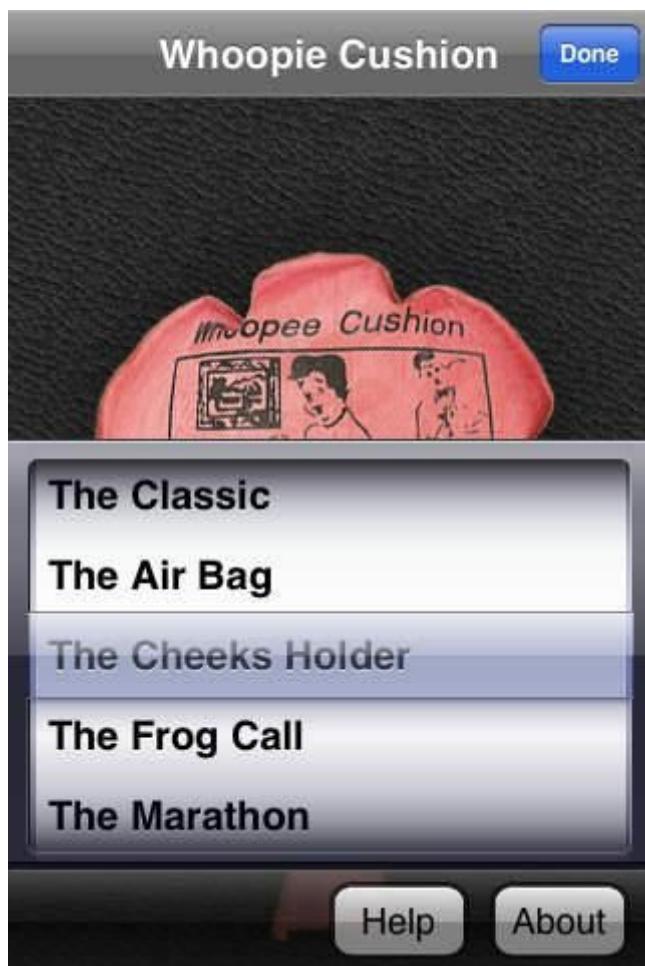

The Whoopee Cushion is a knee jerk classic prank. DoApp takes this old school joke to a new level with a variety of sounds that will have everyone in the boardroom or in your office rolling with laughter. Simply press the Whoopee Cushion to produce a wonderfully funny sound. And, to pick the perfect sound for that next prank, just press the Edit button. There, you can choose from more variations.

<https://itunes.apple.com/ar/app/whoopee-cushion-deluxe/id334092368?l=en&mt=8>

TheBroth, creators of popular Facebook applications Barn Buddy, Kickmania and Puzzlebee. iPhone / iPod Touch application. Fart app. Sounds played shaking device. Time Bomb mode set of timed fart sounds. Set off the whoopee cushion on a friends' phone with a remote trigger. Use facebook API to add burn buddy credits (<http://apps.facebook.com/barnbuddy>) for use the application. Use StoreKit to buy more farts.

Product site: <http://www.thebroth.com/#whoopee>

Using Facebook account, add burn buddy credits for use the application. See Burn Buddy on facebook: <http://apps.facebook.com/barnbuddy>. Using StoreKit to buy more farts.

Themis Bar Review - Themis Bar

Themis Bar Review is the leader in online bar exam review courses. Offering a cutting-edge curriculum backed by decades of experience in bar exam preparation, Themis has revolutionized the way students prepare for their bar exams – and has the pass rates to prove it. The Themis Bar Review mobile app offers students even more flexibility: - Substantive lectures for all testable subjects on your bar exam. - Hundreds of diagnostic assessment questions to gauge your strengths and weaknesses. - Quiz mode for practice and review to hone your skills. All lectures you complete on the mobile app will synchronize with the Themis student portal ensuring that you don't miss a beat with your studies. You must be an enrolled Themis student in order to access the lectures and assessment questions. Wi-fi internet access is necessary for initial log in and recommended for downloading the lecture content.

<https://apps.apple.com/us/app/themis-bar-review/id437372235>

PunkStar Studios Baseball Scorecard - Punk Star Studios

The app for every baseball fan, and private league coach. You can use pen and paper to score a game, or you can use your iPhone/iPod Touch and produce a perfect score sheet at the end of the game for printing.

Product site: http://web.mac.com/punkstarstudios/PunkStar_Studios/Baseball_Scorecard.html
iTunes: <http://itunes.apple.com/us/app/baseball-scorecard/id306494307?mt=8>

iPhone / iPod Touch application.

Development of UITableViews. It will give you the basic play statistics, the same that you would record on a paper scorecard. It's not over encumbered with recording every nuance of every play, it is however a fantastic scorecard generation program.

Lang: Objective C (XCode), iPhone SDK 2.2.1

OS: Mac OS Leopard / iPhone - Frameworks:

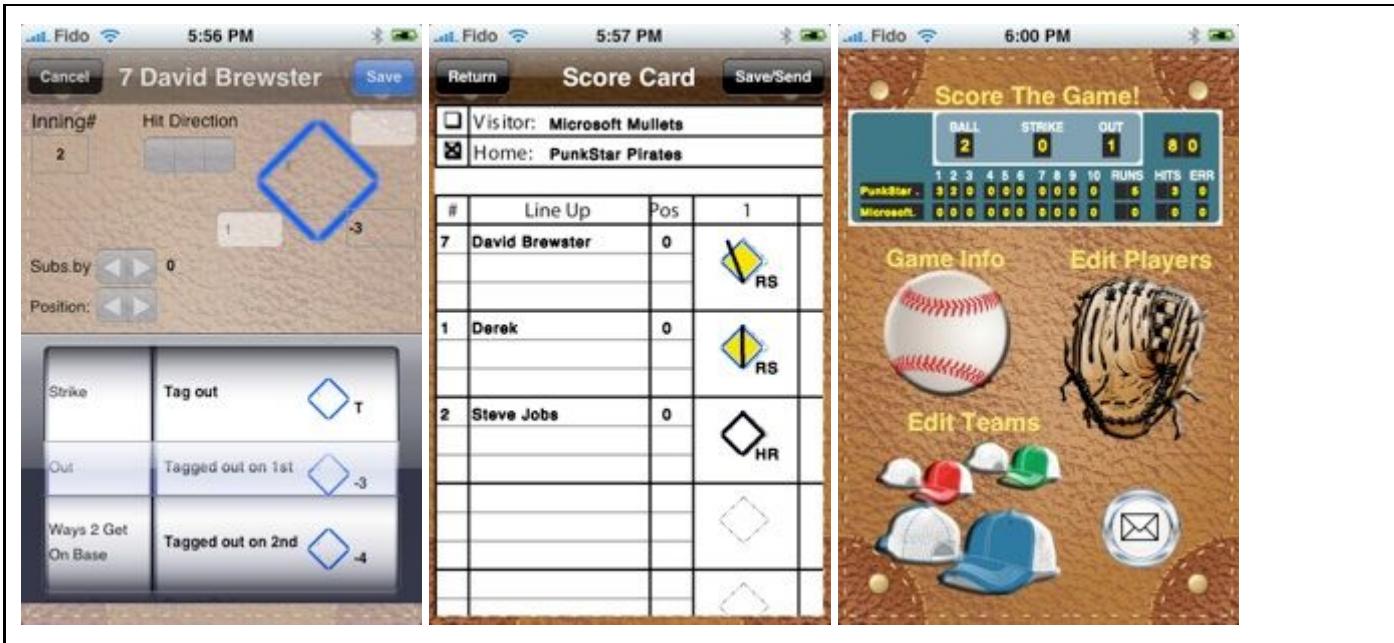

SQLite.3/CoreGraphics/CFNetwork/UIKit/Quartz2D/OpenGL.

Punk Star Studios.

<http://www.punkstarstudios.com/Home.html>

Available since: March 2009.

DogStar - Punk Star Studios

Just simply the most EXTENSIVE Dog Show scoring and database application period and it just happens to be on the best and most convenient platform, the iPhone. Not only can you use this for scoring your dog, but you can enter multiple dogs into the database, it's a complete record of progress for any dog you want to track.

<http://www.punkstarstudios.com/DogStar.html>

<http://itunes.apple.com/WebObjects/MZStore.woa/wa/viewSoftware?id=301353803&mt=8>

iPhone application.

Using UITableViews and SQLite database

Lang: Objective C (XCode), iPhone SDK 2.2.1

OS: Mac OS Leopard / iPhone - Frameworks:

SQLite.3/CoreGraphics/CFNetwork/UIKit/Quartz2D/OpenGL.

The image displays six screenshots of the DogStar iPhone application, arranged in a grid. The screenshots show various screens of the application, including a configuration screen with a dog photo, a main menu with sections like 'Dogs', 'Shows', and 'Exercise types', and a detailed 'Edit Dog' screen with fields for Name, Breed ID, and other dog information. The application uses a clean, modern design with a light blue header and white background.

- Configure DogStar:** Shows a photo of a brown dog and a 'Return' button.
- Main Menu (5:09 PM):** Shows sections like 'Dogs', 'Shows', and 'Exercise types'.
- Edit Dog (5:16 PM):** Shows fields for Name, Breed ID (0), Birthday, Sex, Color, Photo, Tattoo, Chip #, and Sire.
- Breed ID (5:18 PM):** Shows a list of breeds including German Shepherd Dog, Flat-Coated Retriever, French Bulldog, German Pinscher, German Shepherd Dog, German Shorthaired Pointer, and German Spitz.
- Main Menu (6:50 PM):** Shows sections like 'Shows', 'Exercise types', and 'Venues'.
- Exercise types (7:03 PM):** Shows a list of exercise types including Obedience heel off leash w/figure 8, Obedience heel on leash, Obedience heel on leash, Obedience heel on leash - figure 8, Obedience heel on leash and figure 8, Obedience heel on leash and figure 8, Obedience honor, Obedience honor, and Obedience honoring.

iDDL/iCooper - iCooper Inc <http://www.icooper.com>

iDDL Plus DAILY DRIVER LOGS Mobile Warrior created iDDL from the perspective of the driver. Many other systems have created their systems based on the equipment, i.e. Power Unit & Trailer. As a result, many systems hardwire their black box and tablet directly into the Power Unit. Our solution, right down to the black box (ELD device), is portable and easily changed by the driver to a new unit, such as a rental truck, if needed. Here are some of the advantages of the iDDL driver log system:

- An e-log HOS system that is adjustable like a paper log (less the eraser marks)
- The number one reason we hear from drivers that are hesitant to move from paper logs is that they cannot make changes or correct mistakes as needed. That is not the case with our system. If you forgot to go off duty after a long week on the road that is easily updated without external assistance.
- Flexible: We can accommodate nearly any logging workflow – effortlessly
- Tracking IFTA is easy and even automated with our ELD system.
- Need to photo-document a truck issue, documents, receipts or other paper items? You can attach those within our system by using the camera or scanned image making tracking easy.
- Compliance and reporting are the heart of iDDL.
- Reports on driver logs, inspections, and others as dictated in the future are available to be printed (printer required), emailed, as a PDF, and shown on screen.
- We sync with the cloud for access to records requested in a DOT audit without the driver needing to regularly send their logs in or the company having to scan and/or archive them.
- If a truck fails inspection the mechanic can login to our admin web portal once repairs are complete and perform a passed inspection.
- Proven 7-9% increase in driver productivity (save 3-5 hours/week with compliance)
- Our driver's logs & inspections are so easy and quick to complete we can save you hours a week over using paper.
- Over 45 Rulesets preloaded – the most in the industry
- Some of our rulesets include:
 - Oil Fields for Canada, US, & Mexico
 - Passenger
 - Motion Picture
 - Agricultural
 - California
 - Canada
 - Mexico
 - Texas
 - Just to name a few!
- Redundancy and memory at the ELD Device, Phone or Tablet, and in the cloud ensuring records are saved even when connectivity is limited
- To ensure none of your records are lost due to poor network connectivity or a missed Bluetooth connection each stage of our system remembers the data it is accumulating and transmits it once connectivity is restored.
- Customizable driver inspection checklist
- If you need to make additions or changes to the standard inspection checklist this can be done by the user without programming. For example if you drive a motor coach you can add bathroom, cargo and other items that go above compliance and safety.
- OPTIONAL: Add our fully featured in-cab Bluetooth device for 100% ELD Compliance.
- We provide an affordable, custom-built, portable black box (ELD device) that seamlessly connects with your phone or tablet via Bluetooth which in turn syncs with the cloud providing compliance with the upcoming ELD Mandate from the FMCSA.
